Employment

Automated Systems Technician

April 2024 to April 2025

San Bernardino County - Department of Behavioral Health

- Administered and maintained data processing equipment for a department serving over a thousand employees, ensuring uninterrupted workflow and reliability.
- Developed and documented procedures for system support, setup, maintenance, backup, and security - automated recurring tasks including parts of onboarding and documentation.
- Coordinating installation, deployment, maintenance, and upgrades of computer products and software, while training employees on new and existing applications for seamless integration.
- Managing identity and access control to uphold system security, compliance, and operational efficiency while overseeing technical onboarding and off-boarding through custom-developed automated processes.

Service Manager

October 2021 to December 2023

TECHDOCS

- Managed and trained a team of technicians handling 50-100 daily IT support tickets and projects across Windows, Mac, and Linux platforms, with a focus on operational procedures, troubleshooting, and documentation.
- Facilitated major software systems updates and administrative overhaul with process improvements and resulting in boosted technician efficiency and customer satisfaction.
- Acted as the primary customer liaison for projects, translating client objectives into actionable plans and ensuring efficient project delivery.
- Collaborated with hardware and software vendors in procurement, asset management, and inventory control.

Projects

CRM Application, Java, JavaFX, MySQL Server 8

January 2023

- Java application for appointment and customer management, uses JDBC to connect to external MySQL database for all relevant data, and uses JavaFX for a user-friendly GUI.

Inventory Management Application, Java, JavaFX

February 2021

- Java application that manages parts and products for an inventory management system, uses JavaFX for a user-friendly GUI. Ability to add custom parts and products with auto-generated IDs as well as selecting vendors.
